

# Starting with Andersen makes finishing easy.

**Factory-applied 6 9/16" extension jambs** speed installation. They can be ordered for most 200 and 400 Series windows in 4 9/16" and 6 9/16" depths. You can choose between 4-sided and 3-sided (prep for stool) on factory applied extension jambs for double-hung, casement and awning windows. Drywall returns are also available for some windows.

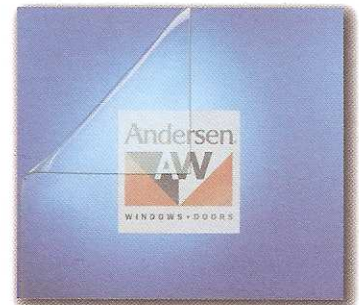

## **Factory-assembled Frenchwood® gliding patio doors –**

All standard sized 2-Panel Frenchwood gliding patio doors are available as factory assembled. The assembled doors arrive with pre-drilled installation holes in the head and side jambs for fast and easy installation. Unassembled patio doors continue to be available.

**Factory-painted interiors** not only save time, they create a uniform long-lasting low-maintenance white finish you just can't duplicate on the jobsite. They're available on most 400 Series windows, extension jambs and interior mull casing.

**Protective film** – Glass on nearly all 200 and 400 Series windows and doors is now protected by a translucent film factory applied to both the interior and exterior glass surfaces. It helps form a barrier against dust, dirt, paint and mortar during construction as well as cuts masking time to a minimum, then peels away for a spotless window.
